Filter Installation

Attaching filters to the drone camera.

INSTALLATION

Step 1:

Filter installation must be done prior to powering on the drone*

Step 2:

Support the gimbal in one hand. Using your other hand, press gently and turn the stock UV counter-clockwise and remove.

Step 3:

Align the filter tabs with the corresponding lens slots on the Mini 3 Pro camera. When seated flush to the lens, press lightly and turn clockwise until the filter clicks into place.

REMOVAL

Step 1:

Follow steps 2 and 3 above to replace the stock UV or change filters.
